PROJECTS

My Things – Product Lifecycle Manager | *React, Node.js, Express.js, MongoDB Atlas, Cloudinary* [🐙 GitHub](#) [Live Demo](#)

- Engineered a full-stack product lifecycle management platform that addressed the common challenge of misplaced invoices, forgotten warranty periods, and unnecessary product replacements by centralizing **50+ product assets**, purchase records, and warranty documents into a single automated management system with intelligent warranty tracking, automated expiry alerts & reminders.
- Architected scalable RESTful APIs using Node.js and Express.js, supporting **200+ product and document operations** through optimized MongoDB Atlas schema design and modular backend architecture with custom **Google OAuth & middleware**.
- Implemented an OCR-powered document processing workflow via Cloudinary, digitizing and managing **100+ receipts, invoices, and warranty cards** while reducing manual record-management effort by approximately **60%**.
- Developed a responsive React frontend with **OpenRouter API** chatbot integration for asset querying, real-time dashboard updates, automated alert generation, and intuitive product organization, enabling information retrieval in under **3 seconds**.

Udgosh 3.0 College Event Management Platform for (KLEBCADWD) | *React, TypeScript, Vercel, Google Forms* [🐙 GitHub](#) [Live Demo](#)

- Developed and deployed a centralized event management platform for Udgosh, streamlining registrations, event discovery, and participant engagement across technical and cultural events.
- Facilitated **500+ registrations** across multiple event categories, contributing to a **60% increase in student participation** and **1000+ event page visits**.
- Built responsive and animated interfaces using React and TypeScript with a Google Forms registration workflow, reducing manual coordination effort by approximately **70%**.
